The **M**achine-learning **I**nvestment **A**ppliance

By Carlos Rodriguez <carlos@S8F.org>, June 5th 2018.

Decrypting A Message from the Future...

It's the **future**, and we no longer have day jobs. We have **ROBOTS** that create and maintain **Automated Investments**, which are controlled by **crypto-currency and security trading algorithms** that us **humans** can't even understand. What we **do** understand, is that they are **so** efficient, it's a **guaranteed** system to make **profits** from **N** starting capital.

The result is what we call **Universal Basic Income.** The **ROBOTS** took all our day jobs, so what we are left with, is simply the **choice of WHAT to invest** our savings in. We simply buy **a tiny $200 appliance called "M.I.A."** on Amazon, send it Bitcoins periodically, and **we get back way more Bitcoins than we put in**. And because of **her**, we do a **lot** of partying and slacking off. **Cheers!**

Ready to get Plug-&-PAID?

- Buy a **4"x2" IOT micro-appliance**, known as "**M.I.A.**" from `GetMIA.io`, for **$275** fully assembled.

- Power it with a **USB cable (or battery pack)** and connect via **Wi-Fi or Ethernet cable.**

- MIA creates a locally-hosted Bitcoin wallet, and a **BTC address** (or choose your crypto-currency) for you send coins to, displays the **QR code** on her 3.5" touch screen. Control it with **a built-in webserver/GUI**, or **SSH/VNC** for nerds.

- Send her capital, and **she invests using a strategy you can choose** from some presets. These presets are the statistically most profitable algorithms on the **ZalgoNet "SWARM" p2p network**, sorted by **projected risk**, based on empirical, anonymized telemetry results. Through **SWARM**, she works and benefits from **other M.I.A.'s** anonymously, creating a **hive-mind mesh** network.

- M.I.A. invests your BTC with **artificially-intelligent day trading algorithms** and "smart" hedge-funding, communicating directly with exchanges using API keys you've entered into the GUI.

- Any **profits** are sent to you as **daily payments** to a **BTC address** of your choosing.

- Go **party!**

Meshed online learning for the Everyman.

Online Machine-Learning will liberate mankind one day. The problem is that currently, it's just **TOO DAMN HARD** for the Everyman to set up or even **understand**. Thus, as of yet, those who benefit from Machine Learning are the Big Corps and Govt's. **M.I.A. Changes this** by making it **trivial** to use the vast powers of **Intelligent ROBOTS** for immediate gain, thus granting financial stability to all.

Beneficial Side-effect: A massive increase in market participation, and liquidity.

With the **Average Joe in 3rd world countries investing** his wages in global markets, get ready for a huge **tidal wave of liquidity**. Suddenly, struggling markets will spring to new life. And this is just the beginning. **Thanks, M.I.A.!**

`https://` → `Bot18.net` (core functionality, now taking **Beta testers!**)
`https://` → `GetMIA.io` (**buy a M.I.A.**, coming soon!)
`https://` → `Zalgo.net` (**p2p network**, coming soon!)
Patents pending.
